Lucid Air 2.11 / UX 3.0 Issues and locations / possible fixes

Rear sunshade	Swipe down from the top of the Pilot Panel (PP)
Massage seats	Tap 3 dots at bottom of PP, tap and hold seat icon and drag to launcher
Parking view	Tap 3 dots at bottom of PP, tap and hold Parking View icon and drag to launcher
Glove box	Swipe down from the top of the PP
Exit CarPlay	Tap CarPlay icon (top near clock/temp)
Curb rash alert	Settings, DreamDrive, Parking features, Curb rash
Pilot panel bright	Decrease brightness, pick darker Theme/Vibe, buy PP screen protector from TWRAPS
Tires incorrect	Change to correct size in settings
Stereo Loud	No fix
Auto heat/cool	I don't use this seat feature, so I am not sure
PP comes down	Seems to occur only when slowing down below about 20 mph, no fix
Offline maps	Have to reload the ones you want
USB music issues	I don't use
Autodim headlights	Push left stalk part way for auto dim, press until click for always on

If you did not have cccv2 natively, but had to purchase the upgrade then recommend unpair / re-pair phone, login, profile, Homelink, etc which may solve many connection issues with your phone.

If issues persist then try soft reboot, long reboot, deep sleep overnight, unpair / re-pair phone, login, profile, Homelink, etc
